INDEX TO VOLUME 134

Alphabetical Table of Contents of Authors

ANDERSON, PAUL J. See ERIC L. CHARNOV

ANTONOVICS, JANIS. See ELIZABETH E. LYONS

AOKI, KENICHI. A sexual-selection model for the evolution of imitative learning of song in polygynous birds, 599

ARCHER, STEVE. Have southern Texas savannas been converted to woodlands in recent history? 545

ATCHLEY, WILLIAM R. Introduction to the symposium, 437

ATCHLEY, WILLIAM R., and SCOTT NEWMAN. A quantitative-genetics perspective on mammalian development, 486

BARKAN, CHRISTOPHER P. L., and MATTHEW L. WITHIAM. Profitability, rate maximization, and reward delay: a test of the simultaneous-encounter model of prey choice with *Parus atricapillus*, 254

BARTELL, S. M. See D. L. DEANGELIS

BAZZAZ, F. A. See H. J. MICHAELS

BENCE, J. R. See R. M. NISBET

BLACKMORE, MARK S., and ERIC L. CHARNOV. Adaptive variation in environmental sex determination in a nematode, 817

BLOWER, SALLY, and JONATHAN ROUGHGARDEN. Population dynamics and parasitic castration: test of a model, 848

BOUCOT, ARTHUR J. See JOHN A. RUBEN

BREDEN, FELIX, and MICHAEL J. WADE. Selection within and between kin groups of the imported willow leaf beetle, 35

BRENKERT, A. L. See D. L. DEANGELIS

BRODIE, EDMUND D., III. Behavioral modification as a means of reducing the cost of reproduction, 225

BRODY, ALISON K. See RICHARD KARBAN

BRYANT, JOHN P., JORMA TAHVANAINEN, MATTI SULKINOJA, RIITTA JULKUNEN-TIITTO, PAUL REICHARDT, and TERRY GREEN. Biogeographic evidence for the evolution of chemical defense by boreal birch and willow against mammalian browsing, 20

CAIRNS, D. K. The regulation of seabird colony size: a hinterland model, 141

CAIRNS, SARA. See DEBORAH RABINOWITZ

CARSON, HAMPTON L., and ROBERT G. WISOTZKEY. Increase in genetic variance following a population bottleneck, 668

CAVENER, DOUGLAS R. Evolution of developmental regulation, 459

CAVERS, PAUL B. See BRENDA FRICK

CHARNOV, ERIC L. See MARK S. BLACKMORE

CHARNOV, ERIC L., and PAUL J. ANDERSON. Sex change and population fluctuations in pandalid shrimp, 824

CHARNOV, ERIC L., and TODD E. DAWSON. Environmental sex determination with overlapping generations, 806

COHAN, FREDERICK M., and ARY A. HOFFMANN. Uniform selection as a diversifying force in evolution: evidence from *Drosophila*, 613

COHEN, DAN, and UZI MOTRO. More on optimal rates of dispersal: taking into account the cost of the dispersal mechanism, 659

CONNELL, JOSEPH H., and MARGARET D. LOWMAN. Low-diversity tropical rain forests: some possible mechanisms for their existence, 88

CONNOLLY, M. S. See CAROL B. LYNCH

CURTSINGER, JAMES W., and I. LORRAINE HEISLER. On the consistency of sexy-son models: a reply to Kirkpatrick, 978

DAWSON, TODD E. See ERIC L. CHARNOV

DEANGELIS, D. L., S. M. BARTELL, and A. L. BRENKERT. Effects of nutrient recycling and food-chain length on resilience, 778

DENEUBOURG, J. L. See S. GOSS

CHARNOV, ERIC L., and TODD E. DAWSON. Environmental sex determination with overlapping generations, 806

COHAN, FREDERICK M., and ARY A. HOFFMANN. Uniform selection as a diversifying force in evolution: evidence from *Drosophila*, 613

COHEN, DAN, and UZI MOTRO. More on optimal rates of dispersal: taking into account the cost of the dispersal mechanism, 659

CONNELL, JOSEPH H., and MARGARET D. LOWMAN. Low-diversity tropical rain forests: some possible mechanisms for their existence, 88

CONNOLLY, M. S. See CAROL B. LYNCH

CURTSINGER, JAMES W., and I. LORRAINE HEISLER. On the consistency of sexy-son models: a reply to Kirkpatrick, 978

DAWSON, TODD E. See ERIC L. CHARNOV

DEANGELIS, D. L., S. M. BARTELL, and A. L. BRENKERT. Effects of nutrient recycling and food-chain length on resilience, 778

DENEUBOURG, J. L. See S. GOSS

DENNY, MARK W., and MARK F. SHIBATA. Consequences of surf-zone turbulence for settlement and external fertilization, 859
DIAMOND, JARED, STUART L. PIMM, MICHAEL E. GILPIN, and MARY LECROY. Rapid evolution of character displacement in myzomelid honeyeaters, 675

EHRMAN, LEE, JAN ROBERT FACTOR, NORMAN SOMERSON, and PIERRE MANZO. The *Drosophila paulistorum* endosymbiont in an alternative species, 890

FACTOR, JAN ROBERT. See LEE EHRMAN
FRICK, BRENDA, and PAUL B. CAVERS. Aberrations in sex expression in *Silene latifolia*, 562
FUTUYMA, DOUGLAS J. Speciational trends and the role of species in macroevolution, 318

GASTON, KEVIN J., and JOHN H. LAWTON. Insect herbivores on bracken do not support the core-satellite hypothesis, 761
GILLESPIE, JOHN H. Molecular evolution and polymorphism: SAS-CFF meets the mutational landscape, 638
GILPIN, MICHAEL E. See JARED DIAMOND
GLASSER, JOHN W. Temporal patterns in species' abundances that imply a balance between competition and predation, 120
GOLDIZEN, ANNE WILSON, and JOHN TERBORGH. Demography and dispersal patterns of a tamarin population: possible causes of delayed breeding, 208
GOSS, S., J. L. DENEUBOURG, J. M. PASTEELS, and G. JOSENS. A model of noncooperative foraging in social insects, 273
GOULD, JAMES L., and WILLIAM F. TOWNE. On the evolution of the dance language: response to Dyer and Seeley, 156
GREEN, TERRY. See JOHN P. BRYANT
GUYER, CRAIG. See JOSEPH B. SLOWINSKI

HAIG, DAVID, and MARK WESTOBY. Parent-specific gene expression and the triploid endosperm, 147
HARRIS, REID N. Nonlethal injury to organisms as a mechanism of population regulation, 835
HEISLER, I. LORRAINE. See JAMES W. CURTSINGER
HOFFMANN, ARY A. See FREDERICK M. COHAN
HÖGLUND, JACOB. Size and plumage dimorphism in lek-breeding birds: a comparative analysis, 72

JOSENS, G. See S. GOSS
JULKUNEN-TIITTO, RIITTA. See JOHN P. BRYANT

KARBAN, RICHARD, ALISON K. BRODY, and WILLIAM C. SCHNATHORST. Crowding and a plant's ability to defend itself against herbivores and diseases, 749

LAWTON, JOHN H. See KEVIN J. GASTON
LECROY, MARY. See JARED DIAMOND
LEIBOLD, MATHEW A. Resource edibility and the effects of predators and productivity on the outcome of trophic interactions, 922
LEVINS, R. See R. C. LEWONTIN
LEWONTIN, R. C., and R. LEVINS. On the characterization of density and resource availability, 513
LIFJELD, JAN T. See TORE SLAGSVOLD
LIMA, STEVEN L. Iterated prisoner's dilemma: an approach to evolutionarily stable cooperation, 828
LIOU, LILY. See TREVOR PRICE
LOWMAN, MARGARET D. See JOSEPH H. CONNELL
LUCCHESI, JOHN C. On the origin of the mechanism compensating for gene-dosage differences in *Drosophila*, 474
LYNCH, CAROL B., D. S. SULZBACH, and M. S. CONNOLLY. Quantitative-genetic analysis of temperature regulation in *Mus domesticus*. IV. Pleiotropy and genotype-by-environment interactions (Erratum), 674
LYONS, ELIZABETH E., NICKOLAS M. WASER, MARY V. PRICE, JANIS ANTONOVICS, and ALEXANDER F. MOTTEN. Sources of variation in plant reproductive success and implications for concepts of sexual selection, 409

MANZO, PIERRE. See LEE EHRMAN
MASCHINSKI, JOYCE, and THOMAS G.

WHITHAM. The continuum of plant responses to herbivory: the influence of plant association, nutrient availability, and timing, 1
MATTHEWS, ROBERT W. See KENNETH G. ROSS
MAYER, MARILYN. See DEBORAH RABINOWITZ
MCCAULEY, DAVID E. Extinction, colonization, and population structure: a study of a milkweed beetle, 365
MCDONALD, DAVID B. Cooperation under sexual selection: age-graded changes in a lekking bird, 709
METCALF, ROBERT A. See ROBERT E. PAGE, JR.
MICHAELS, H. J., and F. A. BAZZAZ. Individual and population responses of sexual and apomictic plants to environmental gradients, 190
MOTRO, UZI. See DAN COHEN
MOTTEN, ALEXANDER F. See ELIZABETH E. LYONS
MURDOCH, WILLIAM W., and ALLAN STEWART-OATEN. Aggregation by parasitoids and predators: effects on equilibrium and stability, 288

NEWMAN, SCOTT. See WILLIAM R. ATCHLEY
NICHOLS, RICHARD A. The fragmentation of tension zones in sparsely populated areas, 969
NISBET, R. M., and J. R. BENCE. Alternative dynamic regimes for canopy-forming kelp: a variant on density-vague population regulation, 377

PAGE, ROBERT E., JR., DAVID C. POST, and ROBERT A. METCALF. Satellite nests, early males, and plasticity of reproductive behavior in a paper wasp, 731
PAIGEN, KENNETH. Experimental approaches to the study of regulatory evolution, 440
PASTEELS, J. M. See S. GOSS
PIANKA, ERIC R. Desert lizard diversity: additional comments and some data, 344
PIMM, STUART L. See JARED DIAMOND
PLEASANTS, JOHN M. Optimal foraging by nectarivores: a test of the marginal-value theorem, 51
POST, DAVID C. See ROBERT E. PAGE, JR.
PRICE, MARY V. See ELIZABETH E. LYONS
PRICE, TREVOR, and LILY LIOU. Selection on clutch size in birds, 950

RABINOWITZ, DEBORAH, JODY K. RAPP, SARA CAIRNS, and MARILYN MAYER. The persistence of rare prairie grasses in Missouri: environmental variation buffered by reproductive output of sparse species, 525
RAPP, JODY K. See DEBORAH RABINOWITZ
REICHARDT, PAUL. See JOHN P. BRYANT
REISS, J. O. The meaning of developmental time: a metric for comparative embryology, 170
ROSS, KENNETH G., and ROBERT W. MATTHEWS. Population genetic structure and social evolution in the sphecid wasp *Microstigmus comes*, 574
ROUGHGARDEN, JONATHAN. See SALLY BLOWER
RUBEN, JOHN A., and ARTHUR J. BOUCOT. The origin of the lungless salamanders (Amphibia: Plethodontidae), 161

SCHNATHORST, WILLIAM C. See RICHARD KARBAN
SEARCY, WILLIAM A., and KEN YASUKAWA. Alternative models of territorial polygyny in birds, 323
SHIBATA, MARK F. See MARK W. DENNY
SHINE, RICHARD. Alternative models for the evolution of offspring size, 311
SLAGSVOLD, TORE, and JAN T. LIFJELD. Hatching asynchrony in birds: the hypothesis of sexual conflict over parental investment, 239
SLOWINSKI, JOSEPH B., and CRAIG GUYER. Testing the stochasticity of patterns of organismal diversity: an improved null model, 907
SOMERSON, NORMAN. See LEE EHRMAN
STEPHENS, D. W. Variance and the value of information, 128
STEWART-OATEN, ALLAN. See WILLIAM W. MURDOCH
SULKINOJA, MATTI. See JOHN P. BRYANT
SULZBACH, D. S. See CAROL B. LYNCH

TAHVANAINEN, JORMA. See JOHN P. BRYANT
TERBORGH, JOHN. See ANNE WILSON GOLDIZEN
TONSOR, STEPHEN J. Relatedness and intraspecific competition in *Plantago lanceolata*, 897
TOWNE, WILLIAM F. See JAMES L. GOULD

WADE, MICHAEL J. See FELIX BREDEN
WASER, NICKOLAS M. See ELIZABETH E. LYONS

WESTOBY, MARK. See DAVID HAIG
WHITHAM, THOMAS G. See JOYCE MASCHINSKI
WINEMILLER, KIRK O. Must connectance decrease with species richness? 960
WISOTZKEY, ROBERT G. See HAMPTON L. CARSON
WITHIAM, MATTHEW L. See CHRISTOPHER P. L. BARKAN
WRIGHT, DAVID HAMILTON. A simple, stable model of mutualism incorporating handling time, 664

YASUKAWA, KEN. See WILLIAM A. SEARCY

Alphabetical Table of Contents of Titles

Aberrations in sex expression in *Silene latifolia*. Brenda Frick and Paul B. Cavers, 562
Adaptive variation in environmental sex determination in a nematode. Mark S. Blackmore and Eric L. Charnov, 817
Aggregation by parasitoids and predators: effects on equilibrium and stability. William W. Murdoch and Allan Stewart-Oaten, 288
Alternative dynamic regimes for canopy-forming kelp: a variant on density-vague population regulation. R. M. Nisbet and J. R. Bence, 377
Alternative models for the evolution of offspring size. Richard Shine, 311
Alternative models of territorial polygyny in birds. William A. Searcy and Ken Yasukawa, 323

Behavioral modification as a means of reducing the cost of reproduction. Edmund D. Brodie III, 225
Biogeographic evidence for the evolution of chemical defense by boreal birch and willow against mammalian browsing. John P. Bryant, Jorma Tahvanainen, Matti Sulkinoja, Riitta Julkunen-Tiitto, Paul Reichardt, and Terry Green, 20

Consequences of surf-zone turbulence for settlement and external fertilization. Mark W. Denny and Mark F. Shibata, 859
The continuum of plant responses to herbivory: the influence of plant association, nutrient availability, and timing. Joyce Maschinski and Thomas G. Whitham, 1
Cooperation under sexual selection: age-graded changes in a lekking bird. David B. McDonald, 709
Crowding and a plant's ability to defend itself against herbivores and diseases. Richard Karban, Alison K. Brody, and William C. Schnathorst, 749

Demography and dispersal patterns of a tamarin population: possible causes of delayed breeding. Anne Wilson Goldizen and John Terborgh, 208
Desert lizard diversity: additional comments and some data. Eric R. Pianka, 344
The *Drosophila paulistorum* endosymbiont in an alternative species. Lee Ehrman, Jan Robert Factor, Norman Somerson, and Pierre Manzo, 890

Effects of nutrient recycling and food-chain length on resilience. D. L. DeAngelis, S. M. Bartell, and A. L. Brenkert, 778
Environmental sex determination with overlapping generations. Eric L. Charnov and Todd E. Dawson, 806
Evolution of developmental regulation. Douglas R. Cavener, 459
Evolution of developmental systems: a symposium organized by William R. Atchley, 435
Experimental approaches to the study of regulatory evolution. Kenneth Paigen, 440
Extinction, colonization, and population structure: a study of a milkweed beetle. David E. McCauley, 365

The fragmentation of tension zones in sparsely populated areas. Richard A. Nichols, 969

Hatching asynchrony in birds: the hypothesis of sexual conflict over parental investment. Tore Slagsvold and Jan T. Lifjeld, 239
Have southern Texas savannas been converted to woodlands in recent history? Steve Archer, 545

Increase in genetic variance following a population bottleneck. Hampton L. Carson and Robert G. Wisotzkey, 668
Individual and population responses of sexual and apomictic plants to environmental gradients. H. J. Michaels and F. A. Bazzaz, 190
Insect herbivores on bracken do not support the core-satellite hypothesis. Kevin J. Gaston and John H. Lawton, 761
Introduction to the symposium. William R. Atchley, 437
Iterated prisoner's dilemma: an approach to evolutionarily stable cooperation. Steven L. Lima, 828

Low-diversity tropical rain forests: some possible mechanisms for their existence. Joseph H. Connell and Margaret D. Lowman, 88

The meaning of developmental time: a metric for comparative embryology. J. O. Reiss, 170
A model of noncooperative foraging in social insects. S. Goss, J. L. Deneubourg, J. M. Pasteels, and G. Josens, 273
Molecular evolution and polymorphism: SAS-CFF meets the mutational landscape. John H. Gillespie, 638
More on optimal rates of dispersal: taking into account the cost of the dispersal mechanism. Dan Cohen and Uzi Motro, 659
Must connectance decrease with species richness? Kirk O. Winemiller, 960

Nonlethal injury to organisms as a mechanism of population regulation. Reid N. Harris, 835

On the characterization of density and resource availability. R. C. Lewontin and R. Levins, 513
On the consistency of sexy-son models: a reply to Kirkpatrick. James W. Curtsinger and I. Lorraine Heisler, 978
On the evolution of the dance language: response to Dyer and Seeley. James L. Gould and William F. Towne, 156
On the origin of the mechanism compensating for gene-dosage differences in *Drosophila*. John C. Lucchesi, 474
Optimal foraging by nectarivores: a test of the marginal-value theorem. John M. Pleasants, 51
The origin of the lungless salamanders (Amphibia: Plethodontidae). John A. Ruben and Arthur J. Boucot, 161

Parent-specific gene expression and the triploid endosperm. David Haig and Mark Westoby, 147
The persistence of rare prairie grasses in Missouri: environmental variation buffered by reproductive output of sparse species. Deborah Rabinowitz, Jody K. Rapp, Sara Cairns, and Marilyn Mayer, 525
Population dynamics and parasitic castration: test of a model. Sally Blower and Jonathan Roughgarden, 848
Population genetic structure and social evolution in the sphecid wasp *Microstigmus comes*. Kenneth G. Ross and Robert W. Matthews, 574
Profitability, rate maximization, and reward delay: a test of the simultaneous-encounter model of prey choice with *Parus atricapillus*. Christopher P. L. Barkan and Matthew L. Withiam, 254

Quantitative-genetic analysis of temperature regulation in *Mus domesticus*. IV. Pleiotropy and genotype-by-environment interactions (Erratum). Carol B. Lynch, D. S. Sulzbach, and M. S. Connolly, 674
A quantitative-genetics perspective on mammalian development. William R. Atchley and Scott Newman, 486

Rapid evolution of character displacement in myzomelid honeyeaters. Jared Diamond, Stuart L. Pimm, Michael E. Gilpin, and Mary LeCroy, 675
The regulation of seabird colony size: a hinterland model. D. K. Cairns, 141
Relatedness and intraspecific competition in *Plantago lanceolata*. Stephen J. Tonsor, 897

Resource edibility and the effects of predators and productivity on the outcome of trophic interactions. Mathew A. Leibold, 922

Satellite nests, early males, and plasticity of reproductive behavior in a paper wasp. Robert E. Page, Jr., David C. Post, and Robert A. Metcalf, 731
Selection on clutch size in birds. Trevor Price and Lily Liou, 950
Selection within and between kin groups of the imported willow leaf beetle. Felix Breden and Michael J. Wade, 35
Sex change and population fluctuations in pandalid shrimp. Eric L. Charnov and Paul J. Anderson, 824
A sexual-selection model for the evolution of imitative learning of song in polygynous birds. Kenichi Aoki, 599
A simple, stable model of mutualism incorporating handling time. David Hamilton Wright, 664
Size and plumage dimorphism in lek-breeding birds: a comparative analysis. Jacob Höglund, 72
Sources of variation in plant reproductive success and implications for concepts of sexual selection. Elizabeth E. Lyons, Nickolas M. Waser, Mary V. Price, Janis Antonovics, and Alexander F. Motten, 409
Speciational trends and the role of species in macroevolution. Douglas J. Futuyma, 318

Temporal patterns in species' abundances that imply a balance between competition and predation. John W. Glasser, 120
Testing the stochasticity of patterns of organismal diversity: an improved null model. Joseph B. Slowinski and Craig Guyer, 907

Uniform selection as a diversifying force in evolution: evidence from *Drosophila*. Frederick M. Cohan and Ary A. Hoffmann, 613

Variance and the value of information. D. W. Stephens, 128
